

## Donation Report 2026 Treloar School and College

The Charity Projects Committee of the Glovers Charitable Trust continues to make transformative dexterous impact for our 180 physically disabled students with complex health and care needs.

Your diligent donation for £500 earlier this year has supported our specialist occupational therapists in helping our learners to have more independent lives. Occupational therapy can deliver life-changing impact for many of our students that do not have the fine motor skills for independent hand control.

Our therapists will work with each individual learner, and often the parents, to identify the goals and targets they want to work on.

When young people learn in practical, tailored environments, their engagement and retention improve, alongside vital life skills such as communication and collaboration.

Your support has helped us to provide the resources and materials for Scarlett, Alex and Aurelia pictured below to experience hands on, interactive sessions within their chemistry curriculum, improving hand strength and dexterity.

Scarlett is working with sand

Alex has made clay

Aurelia is studying jelly

## 2026 Annual Parent Survey

Parents share '**The Best Thing About Treloar's**'

- having everyone supporting my son in one place, **encouraging his independence**
- **staff** have been absolutely amazing
- He has grown into a confident and assured young man and his **future is much brighter** thanks to his time at Treloar's.
- to see him come on leaps and bounds **in all areas** is magical to watch

# A feast for Luke's eyes

Luke is a highly motivated young man. He was determined to become more independent at mealtimes to reduce the support he needed.

His dedicated occupational therapy technician at Treloar's worked in collaboration with speech and language therapy to explore how specialist technology could help him take greater control of this important sociable daily activity.

Using his eye gaze communication device (the tablet screen pictured right), we have helped Luke develop a life skill whilst becoming the first student at Treloar's to operate a Robotic Neater Eater through Alternative Augmented Communication using voice commands.

This personalised solution was developed through close collaboration with his multi disciplinary team and Luke to ensure the system met his specific needs, using equipment funded by donations.

## Transformational impact

Luke can now play an active role in his own mealtimes, giving him greater independence, dignity, and confidence.

This is the difference donations make to everyday living skills. By funding specialist equipment, resources and assistive technology, the invaluable support of the Charity Projects Committee are helping young people like Luke develop life-changing skills to increase their independence for when they leave Treloar's.

"I feel happy using my eye gaze Neater Eater. It gives me **great independence** as I can feed myself which makes me feel proud." Luke

## Occupational therapy deliver:

- Improved choice, control and dignity
- Greater confidence through mastering new skills
- Integrated specialist technology unlocking independence for young people with complex physical disabilities

**"(Treloar's) has given our daughter the ability to begin to become independent and to learn to speak for herself and to make her own decisions."**

Parent feedback

# Natalie's story

## A future full of possibility

When Natalie was diagnosed with cerebral palsy as a young child her family faced an uncertain future.

Despite her physical challenges, they always knew she was bright, determined and full of potential. That potential has flourished since she joined Treloar School.

Natalie was very shy and reluctant to take part in activities when she first arrived.

Today, she is making incredible progress.

With specialist support integrated throughout her school day, Natalie is standing, walking with assistance as pictured right, using communication aids in class to contribute to class discussions and self advocate, and growing in confidence every day.

Treloar's has opened up opportunities Natalie might never otherwise have experienced.

She enjoys music, has learned to play an adapted guitar, loves riding adapted trikes and takes part in a wide range of activities that help her develop new skills and greater independence.

The impact extends far beyond the classroom. Natalie now believes in what she can achieve. Inspired by watching her twin sister at home, she is increasingly confident that she can reach her own goals too. Her family have seen an extraordinary transformation and are excited about what lies ahead.

Today, **Natalie's future looks brighter than ever.**

With access to specialist:

- education
- physiotherapy
- occupational therapy
- speech and language therapy

her family believe she can achieve so much more.

**"Natalie is thriving,**  
she really enjoys  
coming to (Treloar's)  
school.... **it's life**  
**changing for her"**  
Natalie's father

We couldn't deliver all we do without the support of the Livery Companies of the City of London. Together, we are making stories like Natalie's possible, helping young people with complex physical disabilities build confidence, achieve greater independence and look forward to a future full of opportunity.

## Thank you
